On the Subject of Literally Laughing

hahahahahahahahahahahahahahahahahahahahaha. I'm so unoriginal.
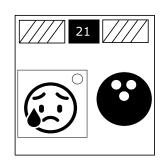

If there is not a selectable coconut, you are looking at a different Needy Module.

This needy module features a sad emoji and a coconut.

In order to deactivate the needy, press the coconut to crus-I mean, make the emoji laugh his butt off.

The emoji bends time and space, so there is a barrier around the emoji to prevent it from catastrophic disasters.

If you do not give away the coconut, the emoji will remain stoic, and a strike will be given.
